WE INVITE TIME DEPOSITS AT 4 PER CENT

Savings Accounts No Matter 4 Per Cent
How Small 4 Compounded

BANKING BY MAIL is easy by Check or Post Office Order.
All banking relations held in strict confidence. No information, not even the
existence of your account, given to anyone. Accounts opened $1.00 up.
Simply send your deposit or first write for further particulars—just as you
wish. The deposit is credited the day it is received and the new bank book—that
evidence of a real start forward, is promptly sent you.
Do business with a strong bank having adequate capital that combines progress
with conservatism and so insures safety.

Billings State Bank

Billings, Mont.

ESTABLISHED 1905

Capital Stock,
Surplus and Profits

YOUR CHECKING ACCOUNT

will enable you to pay
the cancelled checks which
will have indisputable evidence
as well as
a complete record of your expenses and all trans­
actions involving the payment of money. It will
also eliminate mistakes, as there is less chance of
errors in writing out checks than in counting out
money and making change.

YOUR SAVINGS ACCOUNT

will make your surplus idle money earn interest for
you without effort on your part.
By adding to it from time to time, you will accumu­
late a considerable balance before you realize it, and
when the times comes for you to avail yourself of an
advantageous business opportunity requiring a little
capital, you will be able to do so.

YOUR SUCCESS OR FAILURE

will depend entirely on your own efforts.
Starting a bank account is one step toward success,
and every additional deposit is one more step.

ONE DOLLAR

will start an account, and you can add to it any
time and in any amount.

BANK DRAFTS

are used more than any other form of money order,
by merchants and business men in sending money
by mail. Cost less than Post Office or Express
Money Orders. Payable in the United States or
Foreign countries.

YOUR BUSINESS WHETHER LARGE OR SMALL, WILL BE
WELCOME AT THIS BANK.

The Polytechnic

A Practical School for the Young People of the Northwest

LOCATION. Its situation near Billings, the busy, bustling metropolis of eastern Montana, gives it all the advantages of a live, up-to-date city but located on a one hundred and sixty-acre (160) farm two miles from the business center it is far enough removed to avoid all the disturbing elements of a noisy urban life.

ATTRACTIONS. The Polytechnic is a HOME SCHOOL where all students from a distance live in modern dormitories under the care of the faculty. Every side of life of the students is thoughtfully considered. THE PHYSICAL WELFARE OF EACH BOY AND GIRL, through wholesome meals, beautiful living apartments, regular hours and proper exercise, will have its rightful place with the intellectual, social and moral training. THE DEVELOPMENT OF CHARACTER WILL BE THE GREAT WORK OF THE POLYTECHNIC. A selected FACULTY OF EXPERIENCED TEACHERS has been chosen. Every teacher is especially fitted for the peculiar needs of the young people of the Northwest. The COURSES OF STUDY ARE HIGHLY PRACTICAL. The young people who go out from the Polytechnic will be able to do something worth while.

Courses of Study

ENGINEERING. Complete course in Civil, Electrical and Mechanical Engineering, with special reference to the practical side suitable for modern needs.

SCHOOL OF COMMERCE. All commercial branches will be taught and a thorough business education offered. Classes in Bookkeeping, Accounting, Business Practice, Commercial Law, Business Arithmetic and English Grammar.

SHORTHAND AND TYPEWRITING. This course, now considered the great stepping stone to a successful career, will be thoroughly taught with the use of the best systems of instruction.

TEACHERS' TRAINING. A variety is offered, for young people desiring to become competent teachers. Special review classes for teachers preparing to pass examination.

ACADEMIC AND PREPARATORY. A high grade preparatory education suitable for entry into the best colleges and universities.

SCIENTIFIC COURSES. Two-year courses for high school graduates preparing for professional work at the best universities.

CONSERVATORY OF MUSIC. Opportunity given for a complete musical education under the charge of talented musicians. Instruction in Voice, Piano, Violin, Harmony, Harp and Band Instruments.

INDUSTRIAL DEPARTMENT. Many practical trades and industries are taught, carpentry, blacksmithing, cabinet making, wood and metal working, etc.

DOMESTIC ARTS AND SCIENCES. The young people are taught a number of useful home occupations—cooking and home making.

AGRICULTURE. Useful and scientific knowledge of agriculture will be offered to the young people interested by the wonderful opportunities of the farm. Practical farm and garden connection with the school.

EXPENSES. The cost of attendance at the Polytechnic has been reduced to the lowest figure in order that no one shall be shut out from the advantages offered. A limited number will be given the chance to work for a part of their expenses if short of funds.

How to Come
Buy your ticket to Billings. An automobile will meet you if you notify the Institute the train upon which you are to arrive.

WHO MAY COME TO THE INSTITUTE. Any young person over fourteen years of age earnestly desiring a better training for life will be welcomed. There are no entrance requirements. For complete information address

INTRODUCTION.

1912.

The Sixth edition of the R L Polk & Co's Billings City and Yellowstone County Directory including Red Lodge and Carbon County, is presented with the assurance that the work is as complete and accurate as it is possible to produce. All the features of the largest metropolitan directories are incorporated in the work.

This volume contains a complete City Directory of Billings and Red Lodge and of all the villages in Yellowstone and Carbon Counties.

It also contains the names of all the farmers in the Counties, giving the name of the owner of each piece of property, the number of acres, with the assessed valuation and postoffice address.

A complete list of all the banks, churches and societies and all the institutions and organizations existing within the Counties will be found conveniently arranged, and a full and complete description of the Counties and descriptions of all the cities, towns and villages in the Counties will be found in proper order.

A complete classified business directory of all the persons doing business in the Counties will be found in the last section of the work. This classified business directory will be appreciated as a useful purchaser's guide, both by the residents of this community and to all those who look to this market for supplies.

The centre line advertisements have been omitted and each page is four lines longer which materially increases the size of each page and therefore reduces the number of pages in the work.

The publishers wish to extend thanks for the liberal patronage bestowed upon the work, and for the courtesies extended to its representatives.

Respectfully,

R L POLK & CO.

</table>
BILLINGS, MONT.

By L. G. MONROE.

Billings, the County seat of Yellowstone County is the metropolis and distributing center of southeastern Montana and northwestern Wyoming, popularly known as the Midland Empire.

Billings ranks sixth with the great cities of the United States in gain per cent of population during the past decade as shown by the Federal Census. The wonderful city of Los Angeles outstripped Billings just one-tenth per cent in the race of the cities of most rapid growth. Billings gained 211.4 per cent in population from 1900, when there were 3,221 persons here, to 1910 when the government census shows a population of 10,031.

Because of her commercial supremacy in the Midland Empire, the richest domain in point of wealth production from the soil, of all the great Northwest, Billings has an unusually large floating population. This is attributed to the fact that you can reach almost every railway town in Montana and Northern Wyoming from Billings, without change of cars. The actual enumeration by the census takers in 1910, showed a little more than 2,000 names of persons without a permanent place of residence. These of course were disallowed by the Federal Census Inspectors.

There has been a slight falling off in the rapid growth and development of the cities of the west during the past year and a half, with few exceptions, of which Billings is one. Billings has continued to maintain a steady increase in population and a steady, and in some respects, a marvelous commercial development. Therefore, while it cannot be said, as yet, that Billings "has arrived"—that is, attained to the rank of a city of the first class and grade, it can be truthfully said that Billings, "is on the way," is a "comer," and having broken into the rank of cities of the first class, she is destined, at the same ratio of gain to outstrip all rivals and become the most important city commercially, between the Twin Cities,
900 miles east and Spokane, Wash., 600 miles west. It might be well to note that Omaha and Denver, the nearest large cities to the south, are more than 700 miles away.

As evidence of the city's marvelous growth commercially, there have been established here-within the past 18 months, branch distributing houses handling Agricultural Machinery and Farm Implements, representing practically all of the leading manufacturers of the United States. A conservative estimate of the total business done in the hardware and implement business alone for the year 1911, is $3,500,000, or a gain of more than $2,000,000. No other city on the great west can show a like business gain.

Montana is known as the Treasure State, because of her great wealth of Mineral and Agricultural resources, hence, Billings can be appropriately called, "The Key to Montana, the Treasure State." Situated in the Yellowstone river valley, about 100 miles east of the first or eastern range of the Rocky Mountains, whose snow capped peaks are constantly in view, the city is surrounded on all sides by a great agricultural domain, a veritable empire in itself. To the west and east, immediately adjacent to the city, and comprising nearly all of the land of the valley, for a distance of about 100 miles, there is a total of 203,000 acres of irrigated lands.

About 12 miles south of the city and extending along the southern border of the country is a strip of fine agricultural land, known as the ceded portion of the Crow Indian Reservation, and comprising approximately 1,100,000 acres, of which more than 600,000 acres are yet unsold. Within this ceded strip there are about 65,500 acres of irrigated land.

Having 268,500 acres of irrigated land within the city's immediate territory, Billings is the center of one of the largest areas of irrigated land in all of the northwest, and with the completion of the irrigation projects now under way in the Clark's Fork Valley, Montana, and the Big Horn Valley and Basin of northwestern Wyoming, all of which territory is tributary to Billings, and reached by branch railway lines, the city becomes the metropolis of the greatest area of irrigated land in the United States.

The Billings site was platted by the Northern Pacific Railway in 1882, and was named in honor of Frederick Billings, of
Woodstock, Vt., a former president of that great trans-continental railroad. The town is located at the head of navigation of the Yellowstone river, so named by Lewis and Clark, the explorers, because of the yellow stone bluffs which mark its course for many miles.

The city is particularly noted for its street lighting and cheap electric power. There are approximately 200 five cluster light electroliers, which light the business district. It is credited with being the best lighted city of like population in America. It is on the main line of the Northern Pacific Railway and is the southern terminus of the Great Northern Ry., in Montana, and the northwestern terminus of the Chicago, Burlington and Quincy Ry., known as the Burlington route. There are four branch lines which afford daily train service between Billings and Red Lodge, Bridger, Cody and Thermopolis, Wyo. There are three daily through trains, each way over the Northern Pacific Ry., between Chicago, Twin Cities and the Pacific Coasts; and one daily through train each way over the Burlington and Great Northern and the Burlington and the Northern Pacific respectively between St. Louis, Kansas City, Omaha and Puget Sound; and a local train over the Great Northern, between Billings and Great Falls, making a total of ten trans-continental and ten local trains which arrive and depart from the Billings Union Station, or a grand total of 20 trains, for each day of the year. The completion of the Burlington Route's Denver Cut-off this year, will give Billings two more daily trains, and a direct connection with the Gulf at Galveston and a new direct route to Salt Lake, Los Angeles and Southern California. It is the largest initial shipping point of the state, for cattle, sheep and wool. There was shipped 7,000,000 pounds of wool in 1911. Here is also located the largest beet-sugar factory, west of the Mississippi river and the only factory in the United States, north of Colorado and Utah, between Michigan and the Pacific Coast.

More than 200,000 tons of sugar-beets were grown in 1911, for which the farmers received approximately $1,250,000. The factory produced 30,000 tons or 60,000,000 pounds of granulated sugar which is shipped to all parts of the United States.
Billings has several miles of paved streets, 40 miles of cement sidewalk, a sanitary sewer system, water works and a new street car service, operated by storage batteries, instead of the trolley system; and in fact, Billings has the only street cars of this type, west of the Mississippi river. The Traction Company is preparing to build an interurban system, connecting the principal points of the valley, with Billings and eventually extend its lines up the Clark’s Fork and Stillwater valleys, thus giving a new route into the Yellowstone National Park, the Wonderland of the World. It is the principal distributing point in the state for Agricultural Implements and Farm Machinery of all kinds, and is destined to be an important manufacturing center. Nearly every important manufacturer of farm machinery of the country has a branch house here, and there were sold during 1911, more than $3,500,000 worth of Hardware, Agricultural Implements and Farm Machinery. More than 200 traveling salesmen make their headquarters at Billings, and as the surrounding country, rich in agricultural resources is settled up, the jobbing trade of the city of Billings will increase enormously.

Here is located a Polytechnic School for the training of the boys and girls of the state, in the practical things of life. The public schools of the city, including a high school, have more than a local reputation, and are regarded as among the best in the country. There are six modern school buildings of brick and stone, and two frame buildings, costing $209,000, and employing 66 teachers who were paid $62,302.97 in salaries, or an average wage of $130.00 per month for men and $100.00 per month for women teachers. The total cost of maintenance of the public schools for 1911 was $123,671.36. The total enrollment was 2,145, hence, each pupil between the ages of 6 and 21 years, cost the city about $58.00 for his year’s schooling. The Board of Education enters the new year with a cash balance amounting to $25,901.86. It is interesting to note that the school census completed Sept. 20th, 1911, showed a grand total of 3,216 juveniles in Billings. Using the usual multiple of five, the city’s population would now be more than 16,080. The total school enrollment for the county was 4,924. Figured on the same ratio, Yellowstone County
should have a population of 24,720, and that the county has this population, is shown by the fact that the Federal Census of 1910 gave the county’s total population at 22,944. There are approximately 3,300 square miles in Yellowstone County, the total population of which, Federal Census of 1910, was 22,944 against 6,212 in 1900, or a gain of 272.6 per cent, showing a greater increase in rural population than urban. It is interesting to note that the total urban population of the county, is about equal to that of the rural population, being 11,358 and 11,586 respectively. A further comparison shows that there were less than 7 persons to each square mile of area in 1910, and that there were less than 4 persons to each square mile of land. It is estimated that fully 60 per cent of the total area of Yellowstone County is good agricultural land, and this means there are 1,267,200 acres suitable for farming, or 7,920 farms of 160 acres each. Figuring five to the family, there should be a rural population of 39,600; but considering that the county already has 173,000 acres of irrigated land, and that this land is capable, and some day will support a family on each forty acres, there will be added 4,325 farms and a population of 21,625, or a total rural population of more than 60,000. Based on the usual ratio between urban and rural population as shown by the more developed sections of the United States, when Yellowstone County has 60,000 rural population, Billings, Laurel, Columbus, Park City, Huntley, Broadview and other towns may have anywhere from 250,000 to a half a million urban population.

The area of the city of Billings is 4.5 miles. It was incorporated as a town Jan. 11th, 1893.

The public buildings consist of a fine Court House costing $105,000; a city hall, costing $50,000. Work on the erection of a Federal building will be begun this year, which will cost about $200,000. This building will house the post-office, U. S. Land office and Federal Court. There are fire stations equipped with the most modern fire fighting apparatus, which together with a strong well disciplined police patrol, affords as good protection to life and property as can be found in a modern city of the United States.
The city is also well provided with churches, nearly every denomination being represented. As evidence of the splendid civic pride and moral uplift of the community, there has just been completed a three story Y. M. C. A. building costing $85,000, and a movement is now on foot to erect a Y. W. C. A. building to cost $50,000.

Billings is also one of the best built cities of its size in the country. There are several four story brick and stone business blocks. The streets of the entire business section are paved with vitrified brick and creosoted wood block with concrete base. The city has over 40 miles of cement sidewalk.

Among the most notable buildings of this progressive little city are the Masonic Temple and Elk’s Lodge and Club building, either of which would be a credit to any city. The Masonic Temple cost $100,000 and is as completely equipped as temples costing a million. The Elk’s Club building, not only has a pleasing exterior, but is particularly noted for the arrangement, furnishings and architectural beauty of its interior. The decoration of the buffet, a small room 12x18 feet cost $17,000. The building cost $150,000. The city is also proud of its Public Library, which cost $50,000. It is known as the Parmly Billings Memorial Library, and was opened in 1901 as a memorial to the late Parmly Billings who was one of the original town builders and the son of Frederick Billings of Woodstock, Vt., for whom the town was named. All of the leading Fraternal Societies are represented here, among which the I. O. O. F., have strong lodges and fine buildings of their own.

The social features of the city are exceptional in comparison with eastern cities of even twice the population. The leading social organization is The Billings Club. Both the Masonic and Elk’s fraternities keep open house, the latter having thrown open its club rooms to the Women’s Clubs of the city, for Friday afternoon soirees. Besides special events, regular Saturday evening balls are held in the large dance hall, and an elaborate musical and literary program is rendered by local talent each Sunday evening during the winter season. The Friday afternoon receptions, under the auspices of the Wom-
en's Clubs, are designed particularly for the purpose of wel­
coming new comers and introducing them to the social ma­
trons of the city.

Billings has one of the finest theaters in the west, and gets
all of the leading attractions which tour the country. The
entrances to the Babcock Theater, one from each street and
meeting at right angles, differ from most others in that an
arcade effect is obtained, and along the walls are display
windows for the merchandise of the stores adjoining. There
has just been completed a $150,000 theater, (vaudeville and
stock), and besides these there are four moving picture the­
aters.

The city is well provided with hotels, but offers exceptional
opportunities for investment in the construction of modern
apartment houses. The leading hotels are: The Northern,
The Grand and The Commercial Hotel.

Billings is the gateway to the Yellowstone National Park,
the wonderland of the world, via the scenic route reached
over the Cody branch of the Burlington, and known as the
Cody route.

One of the principal assets of the city of Billings, is its
climate. With more than 300 days of sunshine and an annual
precipitation of only 14.96 inches, it has the most salubrious
climate in the Northwest. The mean annual temperature is
47.2 degrees, that of summer 68.2 degrees and of winter 29.4
degrees.

It is a fact, hardly spoken of and impossible to realize by
those who have never lived here, namely, that 24 degrees
below zero in Billings is no colder—that is to say, has no more
appreciable effect upon the human body than zero weather in
the Mississippi Valley, Central States and Atlantic Seaboard.
This is accounted for because of the dryness of the Montana
atmosphere. Therefore in applying the differencial or sensi­
tble temperatures found between Billings and the Eastern
States as noted above, to the summer climate of Southern
Montana, a maximum temperature of 106 in the shade at Bil­
lings would have no more appreciable effect on man than 82
degrees of a warm sultry day in Chicago, St. Louis, Pittsburg
or New York. As a matter of fact while high temperatures
occasionally occur here, there never has been known a case of heat prostration or sunstroke in all this region, and which are of so frequent occurrence with fatal results in the Mississippi Valley and the East.

This place has remarkable freedom from violent winds, due in a great measure to the topography of the surrounding country shut in on all sides by ranges of mountains, except to the eastward, it is protected from the cutting blasts or blizzards which come down from Canada. The only extreme cold weather experienced in winter is when the wind veers to the east. A west and south wind is a warm wind and a north wind is cool but not cutting.

Tornadoes are not known here, except in name. Thunder storms are rare, and seldom, if ever, of the violent kind experienced in the middle west and the eastern states. The nights are always cool, even in the warmest weather. Another remarkable feature of extreme warm weather, is the cool refreshing breeze always experienced in the shade.
MISCELLANEOUS INFORMATION

GOVERNMENT.

CITY.

Incorporated in 1885. Re-incorporated under General Laws in 1893. Election first Monday in April each year.

Mayor—Frank T Woods.
City Clerk—L E Torrence.
City Treasurer—Walter W Watkins.
Police Judge—Frank L Mann.
City Attorney—James L Davis.
City Engineer—C E Durland.
Chief of Police—Bert Talgo.
Chief of Fire Department—Thomas Kennedy.
Plumbing Inspector—Frank L Golding.

Common Council.
Meets 1st and 3d Tuesday of each month.

Aldermen.
First Ward—Fred A Staples, Frank H Kihm.
Third Ward—George E Beavers, E S Gabbert.
Fifth Ward—R E Shepherd, Robert Leavens.

Standing Committees.
Finance—Shepherd, Beavers, Kihm.
Fire—Kihm, Stoddard, Conway.
Streets—Simineo, Kihm, Leavens.
Sewers—Leavens, Shepherd, Gabbert.
Ordinances—Beavers, Leavens, Gabbert.
Public Buildings and Grounds—Scott, Staples, Conway.
Sidewalks—Gabbert, Scott, Staples.
Water and Light—Staples, Simineo, Scott.
Bonds and City Officers—Conway, Shepherd, Stoddard.
Licenses—Stoddard, Beavers, Simineo.
The member first mentioned is the chairman of each committee.

Public Park Commission.
L E Torrence, Clerk.

POLICE DEPARTMENT.
Headquarters City Hall, 28th s w cor 1st av.
Chief—Bert Talgo.
Captain—Wm P Schneider.
Sergeant—W J Terrell.
City Jailer—T J Foster.

Police Commissioners.
S W Soule, Wm V Beers, W A Combs.

Municipal Court.
Court convenes at 9 a m daily at City Hall. Judge, Frank L Mann.
Fire Department.

Headquarters City Hall, 28th s w cor 1st av. Organized Jan 14th, 1886.
Chief—Thomas Kennedy.
Asst Chief—G Herman Smith.
Fire Station No 1—Rear of City Hall.
Chief—Thomas Kennedy.
Captain—R F Windle.
Drivers—Wm M Girdwood, Edward W Beemis.
Hosemen—Louis S Smith, C D Hoyt, Wm Laurelle.
Fire Station No 2—201 S 30th.
Driver—Vincent H Steele.

The building was erected and presented to the city of Billings by Mr Fred Billings, Jr, to be known as the Parmly Billings Memorial Library. The building was erected in 1901 and is prominently located in the business portion of the city. It is built of native sandstone and granite, and is a model library building in every respect, costing about $30,000. The expenses for both building and furnishings were borne by Mr Frederick Billings, Jr. The library contains 10,000 vol-
umes for the free use of its patrons. It is open from 9 a.m. to 9 p.m., Sundays from 2 to 6 p.m., and closed on holidays.

The fee is 10 cents in addition to the regular postage.

**SPECIAL DELIVERY SYSTEM.**

Established October 1, 1886, for all postoffices in the United States. Every article of mailable matter, to which is applied a 10-cent special delivery stamp, or 10c in ordinary stamps in addition to the postage required by law, will upon its arrival by mail, have immediate delivery by a special messenger within the carrier limits of any free delivery postoffice, or within one mile of any other postoffice in the United States to which it may be addressed. This privilege covers registered matter and mail matter of all classes, including drop letters and other mailable matter deposited for local delivery. A record is made at the office of destination of all articles received for special delivery and a receipt is taken from addressee. Hours for special delivery, 7 a.m. to 9 p.m. at all postoffices, and as late as 11 p.m. at all free delivery postoffices.

STREET AND AVENUE GUIDE.

Explanation—On referring to this Directory it will be noticed that the names of the streets and avenues follow each other in strictly alphabetical order without regard to location.

The city is divided into two divisions, northern and southern, the Northern Pacific Ry being the dividing line.

The numerical streets and avenues on the north side are designated as N 27th and 1st av N; those on the south side as S 27th and 1st av S.

The numbers run 100 to a block, the even numbers being found on the south and west side and the odd numbers on the north and east side of all streets and avenues.

Adams, from Madison av to State av.

Alderson av, from Division northwest to W 2d, sixth north of Broadwater av.

TALMAGE - SAYER COMPANY
(INCORPORATED)
HARDWARE, STOVES, HARNESS
Implements, Lumber and Furniture
JOLIET   MONTANA
Montana Realty & Loan Co.

Real Estate

We have city lots, residences, improved and unimproved ranch and farm lands for rent, for sale and to trade. Exceptionally favorable opportunities for securing choice bargains at good terms are offered you through this office.

Abstracts of Title

Our abstract records are Rectigraph (photographic) copies of the official County Records. No danger of any mistake by this method. We have the Exclusive Rights in Yellowstone County—no other abstract office having the rights for this modern, correct method—the only perfect system for abstracting.

Conveyancing

Four Notaries Public, all experienced in drawing deeds, mortgages, contracts, and instruments of all kinds, are at your service.

Investments and Loans

Both investor and borrower find a common meeting point here, with everything arranged for their convenience—all necessary assistance and information at hand and at call—our one small fee for our services—we offer opportunities not to be met with elsewhere.

Insurance

Skilled underwriters have charge of our insurance department. Our companies represent a total strength of many millions and their conduct has been made the standard for courtesy and prompt settlement of claims.

MONTANA REALTY
AND LOAN CO.

The Most Thoroughly Equipped and Up-to-date
Real Estate Organization in Eastern Montana

2822 MINNESTOA AVE. Billings, Mont.

C. Yegen, Pres. Fred J. Mashaw, Vice-Pres.
P. Yegen, Treas. John Branger, Sec.

It's so easy to do business here. You like courteous treat­
ment and a business-like handling of your affairs. No matter
how small the transaction, the whole organization of our firm
stands ready for action. With the interests affiliated with this
firm, no enterprise is too large for us to bring to a succesful
conclusion, while at the same time the smallest matters receive
courteous, careful and thorough consideration.

The big map of the Yellowstone Valley, with its 300 square
feet of surface is one of the things we have done for the conve­
nience of our patrons. Come in and make use of it.

BILLINGS, MONTANA
The visitor who steps off the train at Billings finds himself almost at once becoming imbued with the spirit of energy, progress and optimism which prevades that busy and growing town, and he will soon learn that the confidence in the continued and increasing growth of the city and country tributary to it, which he hears proclaimed on all sides has firm foundations upon which to rest. For years the residents of Yellowstone County have been keenly alive to the many advantages this section of Montana possesses, and have shown most commendable energy in developing their resources and in making them known to others. They have worked themselves and have put their money to work at home and have reaped golden rewards.

The county is a large one, extending almost from the Wyoming line on the south to the Musselshell River on the north, with eastern and western boundaries widely separated. The Yellowstone River flows through the county from west to east and gives it its name. The Northern Pacific Railway follows the stream throughout the county and two branches, one to Red Lodge and the other to Bridger, in the Clark's Fork Valley, in Carbon County, issue from the main line at Laurel. From the south comes the Burlington Railroad, terminating at Billings, with branch lines to Cody and Kirby, Wyoming. The Chicago Milwaukee & St Paul runs along the banks of the Musselshell River supplying transportation facilities to the norther part of the county. The Great Northern Railway, by the Billings & Northern division, penetrates the country from the north to south in its eastern part. Other railroads are expected to build into this fertile and productive territory.

So far as known the mineral wealth of Yellowstone County is confined to building stone and coal. There are large areas

F. DeHAVEN J. B. MURPHY
All We Know is Advertising Sign Tacking and Theatrical Advertising a Specialty
RED LODGE - MONT.
of coal lands and large mines have recently been opened up at Roundup near the Fergus County line.

The stock raising industry was in early days the chief industry and is a very important one yet. Great numbers of horses, cattle and sheep are raised. Billings is one of the great primary wool markets of the United States. The transformation that is going on throughout Montana—the conversion of grazing lands into farming lands—has already taken place in a marked degree in this country. A number of the large stock ranches have already been divided into small tracts for farmers, and as the open range has steadily diminished, the stock business has been forced back to the less valuable lands and to those more fitted for grazing than for farming.

Many irrigation ditches bring water to the river bottom and bench land of the county, and no greater crops of all kinds are grown anywhere, while the high lands produce wonderful crops of wheat, alfalfa and other produce without irrigation.

Within a radius of fifty miles of Billings there are said to be 500,000 acres of land under irrigation and every acre producing a crop of some kind. Within the same radius are thousands of acres more which are to be reclaimed by projects now under way or projected. Within a circle of 125 miles in diameter, with Billings as the center, are 1,500,000 acres of fertile lands susceptible of irrigation and there is water to reclaim them.

Alfalfa yields wonderful crops and is of a superior quality. It is always in demand and is a great money-maker for its growers. Five tons, which sell from $5 to $8 per ton as hay, can be raised per acre. Thousands of sheep are brought into the county and fattened on alfalfa, sometimes supplemented by a grain ration.

Grain of all kinds grows in profusion and of superior quality. Wheat produces 35 to 50 bushels; oats, 50 to 100 bushels; barley, 35 to 70 bushels; potatoes, 150 to 600 bushels; sugar
beets, 12 to 20 tons; alfalfa, 5 to 7 tons; corn, 25 to 75 bushels, while all small fruits, apples, melons, tomatoes and garden truck produce in abundance. Any crop which may be successfully grown in the same latitude elsewhere may be grown and the yield is usually greater than in other places.

Billings has the only sugar factory in Montana or the Northwest. It was completed in 1906 at a cost of $1,250,000 and made its initial run, consuming the beets raised on 7,000 acres of land. The acreage has been increased this year to the extent of 9,000 acres, making 16,000 acres of beets harvested this year.

The Yellowstone Experiment Farm is located 25 miles northwest of Billings in the Lake Basin Country. The soil is a medium clay. "The results from this farm," says Bulletin 74 of the Montana Experiment Station, page 76, "will be of interest to land owners and to others throughout most of the dry farming area of the central part of the State. The yields bespeak a very profitable utilization of these lands in the very near future."
YELLOWSTONE COUNTY DIRECTORY

Following is a complete alphabetically arranged list of all towns, villages, post offices and railway stations in Yellowstone County. Business firms and all individual names will be found at their respective post offices. Farmers and farm tenants names will be found under the heading of Residents and Farmers.

**BLAKELEY.**

A discontinued postoffice, on the N P Ry in the Crow Indian Reservation, 10 miles s e of Custer, the postoffice.
BROADVIEW.

“For additional names see Farmers list following."

The Commercial Center of the Great Lake Basin.

Is situated on the G N Ry, about midway between Billings
and Judith Gap, and is the center of a rich agricultural area
about 50 miles in diameter, including what is known as the
Great Lake Basin. This district is rapidly developing into
one of the richest grain producing sections in the country.

Excellent transportation facilities are afforded by the G N
Ry, which runs two passenger trains daily each way, besides
giving the best of freight service between Broadview and
the principal jobbing centers of the country, both East and
West.

The geological survey shows this basin to be underlaid
with a fine body of coal, which has been opened up near
Broadview, showing a high grade quality. This, with the
agricultural resources of the district, gives Broadview a most
promising prospect.

Broadview has a commodius public school building, two
churches with good church buildings, one grain elevator, and
the usual number of mercantile establishments, also some
very fine residences. While the growth of the town has not
been phenominal, it has been substantial and permanent, and
there is a constant demand for more buildings, and none
ever stand vacant. T H Symms, Postmaster.

JUNCTION.
A station and discontinued postoffice, on the N P Ry, 53 miles n e of Billings. Mail to Custer.

KEISER.
A station on the C B & Q Ry, 9 miles n e of Pryor, the postoffice.

LAUREL.
Is located in the valley of the Yellowstone, at the Junction of the main line of the N P Ry and the Red Lodge branch of the same road, and is maintained by both her railway and agricultural industries. Contiguous to her is the most prolific and productive agricultural area of Montana, the principal products thereof consisting of cereals, fruit and sugar beets. From all these, tremendous yields are obtained, the beet fields largely maintaining the sugar factory located some sixteen miles e of us, and our fruit rivaling in both flavor and quality that produced in the most favored regions of either Washington or Oregon. As the terminal division point of the N P Ry, with one of the largest and most modern roundhouses to be found in the entire West, with a railway payroll averaging from $25,000 to $40,000 per month and constantly increasing, our city derives from this source a revenue of tremendous importance. To this will soon be added the terminals of both Montan…
the Burlington and G N railways, and when the plans looking
to this have been consummated, Laurel will have become the
most important railway center between St Paul and Port-
land.

The city administration of Laurel have finished the con-
struction of a waterworks and sewerage plant on an elaborate
scale, and with the completion of this public utility enterprise
this city has become one of the most desirable residence towns
to be found in the entire state.

The most salubrious climatic conditions prevail in Laurel
and the surrounding country, thus adding to its manifold at-
tractions. E L Fenton, postmaster.

PAINTED ROBE.
Is a station on the Billings & Great Northern Ry, 54 miles n w of Billings. Mail to Broadview.

PARK CITY.
Park City is located on the main line of the N P Ry, 25 miles w of Billings, in a very fertile part of the Yellowstone valley. The townsite is perfectly level, the buildings well painted and well kept, while the large shade trees, the smooth, green lawns, the beautiful park, and the clean, well graded streets all lend their charms to make it a pleasant place in which to live.

Its calm, conservative citizenship has prevented any mushroom growth, while on the other hand it has resulted in a safe, sure, and steady development which is only in its infancy.

Around Park City may be found 300, 400 and even 500 acre farms that can still be had at a reasonable price, and which will eventually be cut up into orchard tracts of from 10 to 40 acres. A golden opportunity awaits some good real estate firm that would subdivide these large tracts and place them on the market on easy terms.

The land around Park City is of the very best. With an abundance of water for irrigation, the richest of soil, and a
good growing climate the crops of sugar beets, alfalfa, grain, etc., are always excellent and the yields surprisingly large. Here we find the oldest and best orchards, the highest per cent of saccharine matter in the sugar beets, the banner crop of oats per acre (150 bus.) and the largest yield of potatoes per acre.

It is to Park City that the land seeker is brought during the growing season and shown the orchards hanging full of luscious fruit, the vegetables, such as tomatoes, celery, cabbage, onions, watermelons, cauliflower, musk-melons, etc.

By intensified farming and fruit growing a few acres can be made to produce as much as a large tract does now, and the value of the land is based upon the returns therefrom. It can be readily seen, therefore, that rich returns await those who get this land at the present prices and develop it to a high state of cultivation. There is room for an army of land seekers and home builders here.

Lying north of and tributary to Park City, is the great Lake Basin country which is being rapidly settled. The showing made by this country last year in the face of the drouth proves that it is beyond the experimental stage and that success is sure where the work is done in accordance with scientific principles. The wheat crop last year went from 10 to 18 bushels per acre which, when we consider the unusually dry season, was a good showing indeed. Under favorable conditions this year, this so-called dry land will yield from 25 to 40 bushels per acre. There may still be had good dry land homesteads near Park City.

Here you will find a community of generous, broad-minded, intelligent people so thoroughly imbued with the western spirit of hospitality that you will feel at home from the very first day. Exp, Northern. Tel W U. Wm C McMorris, postmaster.

The Directory represents the city and all its varied interests

Are you doing your share to promote the progress of your city?

"The DIRECTORY IS THE COMMON INTERMEDIARY BETWEEN BUYER AND SELLER."

Show your public spirit by making the Directory a creditable representation of this community.
A thriving, hustling, yet steady going city of 5,500 people situated at the extreme end of the Rocky Fork Branch of the Northern Pacific Ry, 44 miles from the main line. The county seat of Carbon, equal to any in the great state of Montana in fertility of soil, diversity of crop production, variety of resources and the only county in Montana—and for that matter, in the vast Northwest—where coal of untold and unmeasurable and time enduring supply exists—semi-bituminous—equal to any demands that may be made upon it for railroad, factory or domestic purposes. The source of water supply is Rocky Fork creek, a stream of pure and sparkling mountain water, and a gravity system is utilized, tapping the creek about two and one-half miles above the town.

Telephones, electric lights, sewerage, cement sidewalks and many other improvements to the city have been added as the demands required, until Red Lodge is now one of the best and most progressive county seats in the state.

Red Lodge is at the terminus of the Rocky Fork spur of the Northern Pacific, 44 miles from the main line, and 45 miles from the Yellowstone park by trail over the Beartooth mountains. It has excellent schools, churches, business houses of every kind, and is the political and trades center of the county.

Red Lodge is a modern little city of which its people may well be proud. Here, the cost of living is reduced to a minimum for the man who labors with brawn or brain. It has many stores of all kinds, well stocked with the best goods the market affords, and competition is very keen. Hence service is perfect, and quality of the best. A big item in saving is the fuel, best coal delivered costing but $3.25 per ton.

Financial statements of the three banks show the city and country surrounding to be prosperous. Two large hotels, a hospital, a brewery, a Masonic temple, Labor temple, five school buildings, and a fine residence district with plenty of modern homes in all parts of the city are some of the things for which the Red Lodge citizen may be thankful.

Theatres.
Finn Opera House—Billings av n w cor 13th, Seating Capacity 600.

STREET AND AVENUE GUIDE.
Explanatory.
A thoroughfare when running north and south is designated an avenue; when running east and west a street.

All Avenues and Streets in the following guide are compiled alphabetically irrespective of their relative positions.

Billings avenue and an imaginary extension of the same along the right of way of the Northern Pacific Railway and East and West Eleventh streets have been made initial points of numbering and the divisional points in the application of compass designations to the streets. Thus to the first block north or south of Eleventh street the numbers 1 to 99 have been assigned; to the second block 101 to 199; to the third block 201 to 299; to the fourth block 301 to 399; to the fifth block 401 to 499; to the sixth block 501 to 599; to the seventh block 601 to 699; to the
eighth block 701 to 799; to the ninth block 801 to 899; to the
ten block 901 to 999; to the eleventh block south of Eleventhstreet 1001 to 1099; to the twelfth block 1001 to 1199; to the
thirteenth block, 1201 to 1299; to the fourteenth block 1301 to
1399; to the fifteenth block 1401 to 1499.

To the first block east or west of North or South Billings
avenue, 1 to 99; to the second block 101 to 199; to the third
block 201 to 299; to the fourth block, 301 to 399; to the fifth
block, 401 to 499; to the sixth block, 501 to 599; to the seventh
block west, 601 to 699; to the eighth block, 701 to 799; to the
ninth block, 801 to 899; to the 10th block, 901 to 999.

All Avenues crossing Eleventh Street have the prefix North
when north and the prefix South when south of the same; all
Streets crossing Billings Avenue have the prefix East when east
and the prefix West when west of the same.

Adams av—From Eighth st S to Rock Creek, three W of
Billings av.

Billings av—The main business avenue of the city extending
from a point about one block n of the depot of the N P Ry at a
point bet Fifth and Sixth sts directly south to Rock Creek, it
being the divisional avenue of all streets in the city.

CARBON COUNTY

Carbon County, organized in 1895, soon after the segregation of the territory comprising the county from the Crow Indian Reservation, has been rapidly settled and its growth has been marvelous. Bounded on the north by the Beartooth Mountains, from which spring several large rivers, and numberless streams, the lands of Carbon County are especially well watered. Its soil is productive and its climate healthful and invigorating. While essentially a farming, fruitgrowing and stockraising county, Carbon is also the chief coal producing section of the Northwest. It has the largest, best known and most inexhaustible coal measures in Montana, which are extensively operated, thus affording a permanent and constant home market for the products of the farms. The presence of these three industries—each flourishing, and helpful to the others—insures the prosperity of the whole community.

Twelve coal mining plants are in operation in Carbon County, and employ an aggregate of 2,000 men.

200,000 tons of coal are annually produced in Carbon county. During the past year extensive development work has been done at Red Lodge, Washoe and Bear Creek, and the coming season will show a very large increase in the production and in the number of men employed.

Carbon County has over 558,968 acres of unappropriated Government land. This land is almost all on the divides between the principal streams, which traverse the county from the mountains on the south, emptying into the Yellowstone River on the north. These streams are the Stillwater, the two Rosebuds, Rock Creek and Clark's Fork and their tributaries. With the exception of Clark's Fork all of them have heavy falls, so that the water can be carried by ditches over the higher lands between with comparatively slight expense. They fur-

RED LODGE - MONT.
nish ample irrigating water for all the settled lands and then their full capacity is not nearly reached, as is proven by the fact that the rights to the water of but one stream, Rock Creek, have been adjudicated.

Of the 600,000 acres, at least one-fourth, or 125,000 acres are suitable for dry farming. Most of this land is between Rock Creek and the Rosebuds and Stillwater. The soil is principally a black, sandy loam, and abounds in springs and small streams.

Dry farming has been successfully practiced for several years in the southern part of the above territory, and the yield of crops has compared very favorably with adjoining irrigated lands. The principal crops are wheat, oats and barley. Yields average for oats from 60 to 90 bushels, wheat 30 to 40 bushels, and barley from 40 to 45 bushels per acre.

There is one grain elevator and numerous grain warehouses throughout the county.

There are creameries at Bridger, Red Lodge and Fishtail.

Joliet has a flour mill of 200 barrels capacity. The plant was erected at a cost of $50,000. There are other good locations for flour mills which will be utilized when the wheat supply is increased.

The most important agricultural section of the county is the Clark's Fork Valley, which is one of the most productive portions of Montana, furnishing as great a variety in products of agriculture and horticulture as may be found in the State, from wheat to corn. The valley, varying in width from four to ten miles, is nearly one hundred miles long, extending from Laurel, Montana to Wyoming. Transportation facilities are furnished by a branch line of the Northern Pacific railroad from Billings.

Sugar beets are extensively grown and are shipped to the Billings beet sugar factory. All grains and grasses yield prolifically. Apples, plums, pears, peaches, watermelons and cantaloupes are grown to perfection. Even a little tobacco is grown for home consumption. The cantaloupes are said to be equal in flavor to those grown at Rockyford, Colorado; and if they were grown in quantities so that shipments in carload
lots could be made at regular intervals they would be eagerly bought by residents of Montana at prices assuring large profits to the growers.

Fruit grows to a good size, is excellent in flavor and appearance, is free from worms and possesses splendid keeping qualities. In this valley near Fromberg, is the celebrated Clark orchard.

On irrigated lands the principal crops vary with the altitude. In the southern central portion of the county, where the altitude is about 5,000 feet, the chief crops are wheat, barley, oats, potatoes and timothy hay, all of which yield above the average, and are of exceptional quality, as instanced by oats weighing from 40 to 45 pounds to the bushel. In the lower altitude to the above mentioned crops may be added alfalfa, hay, sugar beets, and apples.

These irrigated lands are largely supplied with water from individual rights, or an interest in a neighborhood ditch, there being comparatively few incorporated ditch companies, and the water right sells with the land. Such lands sell from $25 to $50 per acre, until the fruit belt is reached and then the price advances to $100 to $150 per acre, the prices depending upon location, fitness for special crops and improvements. Such lands are selling at prices which will seem low a few years from now. Unirrigated lands can be bought for $10 per acre or less.

Red Lodge, the county seat, is the largest town. The city owns its own waterworks, which is a most excellent system, originally costing $35,000, and is now valued at $75,000. The city has recently completed a sewerage system costing $30,000. Between twelve and fifteen miles of concrete sidewalk are now completed, and more walk is being added continually.

Other thriving towns are Absarokee in the Stillwater River section; Fishtail, in the eastern section of the county; Joliet, on lower Rock Creek, which is the trading point of a rich farming and fruit country and where a waterworks system and an electric light plant are being installed; Fromberg, in the center of the richest part of Clark’s Fork Valley; Bridger, in the same valley, having both agriculture and coal mining as the basis of

its prosperity; Belfry, a railroad junction and trading place, and Bear Creek, where are five coal mines.

There is a strong probability that oil will be found in Clarks’ Fork Valley. In the mountains are mining claims, showing ores of gold, silver, lead and copper.

As a place for an outing Carbon County offers many attractions; the climate is healthy; the streams are filled with trout; the foothills furnish fine hunting of small and feathered game, while all kinds of large game are to be found farther back, and the forests, the streams, the lakes and the mountains contain some of the most picturesque scenery in America.

JOLIET.
Joliet is an ideal home town situated on Rock Creek, a fine
tROUT stream about 30 miles south-west of Billings, and 28 miles
north of Red Lodge, the county seat, on the Rocky Fork branch

CHARLES J. DOUSMAN
LAWYER
STAPLETON BLOCK - BILLINGS, MONTANA.
of the N P Railroad. Centrally located in Carbon County, and in the heart of one of the most substantial farming and fruit growing districts in the treasure State. Her resources are great, having waterworks, natural sewerage, natural power, a fine grade of coal within two and one-half miles and the finest soil on earth. Dozens of beautiful homes adorn her residence streets, and substantial brick buildings (home made brick) are to be seen in her business district. Joliet boasts of better accommodations for the traveling public than many much larger towns—having three brick hotels, well equipped and nicely furnished, two of which are steam heated, hot and cold water facilities. She has two substantial banking houses, two large general merchandise establishments, one cash grocery, an exclusive hardware store, one butcher shop, a drug store, a confectionery, two real estate firms, one plumbing shop, two blacksmith shops, a wall paper and paint store, two barber shops, two telephone exchanges, two livery stables, a live up-to-date newspaper and job office, five saloons and four churches. Mail daily. Lucius Whitney, postmaster.
