Diamond Art Keychain Instructions

1. Use one of the patterns provided or create your own design!
2. Draw your design on the fabric if needed.
3. Leave space for you to attach your keychain. Do not trim away the extra fabric yet!
4. Use the tray to organize your stones.
5. Use the fabric glue on each stone, or put a layer of glue on your fabric.
6. Use the DIY pick-up tool to pick up your stones and place them on the fabric.
7. Make sure they stick!
8. Glue or sew your string in place. You may also create a small hole in the fabric and loop the string through, making sure to leave two tails.
9. Tie the string to the keychain.
10. If you created a hole in your fabric, glue string in place around the hole to keep the fabric from fraying.
11. Trim any excess fabric around your design.
12. Seal the fabric edges with the fabric glue to keep from fraying.
13. Let dry.
14. Enjoy your keychain!
