

We Are Water Protectors is full of images showing humans as one with nature. Draw a picture of you with something from nature or a natural resource that you would like to protect.

On the last page of this story, people are gathered for a march. Some people are holding signs. Think about a natural resource in your community that needs to be protected. Design your own march sign.

Perform a simple science pollination experiment:

Pour water into a glass or a bottle with a top, then add a few drops of cooking oil (maybe with a bit of food colouring or glitter for contrast, if you like). Shake it up and try as hard as you can to mix the two. Observe.

What did you notice?

What surprised you?
